### FISCAL ANALYSIS

#### Assumptions:

1. The amended bill requires systems that are already required to obtain the appropriate discharge permit in conjunction with an aquifer recharge or mitigation plan be required to meet either primary drinking water standards or the non-degradation requirements.
2. The amended bill does not impact the work load and resources associated with the issuance of ground water permits.
3. The amended bill clarifies the level of standards that must be met for discharges associated with an aquifer recharge or mitigation plan.
